Introduction

The benefits of Screens & Barriers:

- Attract passers by and increase turnover.
- Extend alfresco trading to virtually all year round.
- Increase visibility and raise awareness.
- Enliven any front of house alfresco area.
- Introduce eye-catching colours, brand graphics or public art at ground level.
- Define, enclose and protect outdoor floor space.
- Maintain boundaries and control crowds.
- Protect customers from the elements.
- Reduce dust and dirt blown into the premises from the street.
- Improve customer privacy and attract families.
- Customise with menu cases and other accessories.
- Comply with the mandatory requirement for Council licensing policies to include crime prevention measures.
- Create physical barriers between patrons' possessions and opportunistic thieves.
- Avoid patrons "pushing back" onto the highway in contravention of License Conditions.
- Discourage patrons from straying into neighbouring premises or the Highway or leaving before paying.
- Screens and Planters work well together to bring a scenic look to alfresco areas.

Ropes & Posts

- 15kg Stainless steel
- 33cm bases with 6 eyelets

Portable Screens

SmartScreens With Bases

Benefits

- Quick and easy-to-use portable system.
- Ideal for temporary street cafe arrangements.
- Easily upgradeable for use with ground sockets.
- Bases are part-exchangeable for ground sockets, for ease of upgrade as alfresco trading income grows.

Portable Screens

SmartScreens With Bases

Features

- Stable in winds of up to Beaufort Force 6.
- Shatterproof stainless steel bases as sure stability in virtually any alfresco area, whilst maintaining design continuity throughout the range.
- Easily rollable bases are also supplied with carrying handles, for use by staff handling the heavier bases.
- Timber footpads avoid scratching polished flooring.
- Removable panel bars slot between posts or attach to wall brackets and/or planters.
- Bespoke panel lengths.

ORIGINAL: Portable Range 97 SmartScreens with bases and breathable mesh panels.

UPGRADE: Range 97 SmartScreens, with posts in deck sockets

Portable Screens

Portable Rigid Terrace Screens

Ideal for front of house alfresco areas. Portable Rigid Terrace Screens can be supplied matched to corporate colours, with logos or branding, which will increase the visual impact of your premises helping to attract passers-by and increase footfall.

Portable Screens

Portable Rigid Terrace Screens

Features

- Choice of 5 Styles in two heights.
- Stable in winds of up to Beaufort Force 3 when used with portable stands.
- Compliant with UK Planning and Highways Legislation.
- Choice of easily printed upper and lower panels.
- Galvanised and powder-coated aluminium frames.
- 6mm toughened safety glass upper section
- Highly durable, ideal for busy areas and frequent use.

Portable Rigid Terrace screens are essentially the same as Fixed Rigid Terrace screens but with added feet. For more information on the styles and sizes available, please refer to pages 16 - 20.

BROWN RAL 8019	IVORY RAL 1015

Planters

Add variety, interest, biodiversity and a sense of the natural world to any alfresco development.

Features

- Watertight, frost proof, weather resistant
- Galvanised steel, zinc, glass fibre, plastic and timber construction.
- Optional decorative stainless steel edging.
- Natural, lacquered, metallic, ceramic or any colour RAL finish.
- Cubed, rectangular, circular and tapered shapes.
- Optional lockable castors for mobility.
- Suitable for living plants or topiary.

To ensure stability in windy conditions, ballast is designed into Planters to suite site specific briefs, as required.

Breezefree do not provide plants, topiary or maintenance, but are happy to make introductions.

Our selection of durable Planters do not leak, whether lightweight glass fibre or heavyweight hardwood is required.

Fixed Screens

SmartScreens in Ground Sockets

Benefits

- Eliminate risk of customers repositioning the licensed boundary or “pushing back”.
- Greater stability in wind-swept locations when compared with bases.
- Quicker and easier to set up and dismantle on a daily basis when compared with bases.
- Ensure the smart and linear appearance of an original installation (bases are not always correctly set up).
- Prolonged all-year round alfresco trading with seasonal arrangements.

Fixed Screens

SmartScreens in Ground Sockets

Features

- Stable in winds of up to Gale Force 8 with removable panels.
- Variety of socket types for use on virtually any terrain and in exposed locations.
- Bespoke panel lengths.
- Removable panel bars slot between posts or attach to wall brackets and/or planters.

Laminate	2m

Fixed Screens

SmartScreens in Ground Sockets

Seasonal arrangements for prolonged year-round outdoor trading.

Not In Use

SmartScreens removed and standard ground sockets closed-off with caps, when out of normal trading hours, in compliance with Tables and Chairs Licence Conditions.

Summer Configuration

Summertime arrangement with removable Range 97 SmartScreens in standard ground sockets with breathable mesh panels.

Winter Configuration

Wintertime Arrangement with removable Range 160 SmartScreens using the same standard ground sockets, with acrylic canvas panels and marine grade Clearview PVC windows.

Fixed Screens

Glazed SmartScreens

The best quality slimline balustrading system for use in exposed locations.

Glazed SmartScreens give outside spaces a distinctive, modern, architectural feel whilst ensuring stability in virtually any exposed environment.

Fixed Screens

Glazed SmartScreens

Features

- Stable in winds of up to Hurricane Force 12
- Universal clamping system accommodates 8mm to 20mm glazing.
- Optional glazing gaskets for draft free panel joints.
- Full colour digital printing available.
- Configurations accommodate angles from 40° up to 128°.
- Glazed doors up to 2200mm high, with optional locks.
- Durable build quality compared to proprietary balustrade manufacturers.
