BARRIERS | SMARTSCREENS

SmartScreen panels come in a variety of materials - including canvas in a variety of colours and a breathable, fully brandable mesh.

Panel lengths are made to order to ensure your SmartScreens fit your area perfectly.

PANEL TYPE	MAX RECOMMENDED LENGTH
Polyester & Acrylic Canvas	2000mm
Reinforced & Clearview PVC	
Breathable Mesh	

Canvas panels can be branded with simple logos to promote your business or a brand.

Mesh and PVC Screens can be fully printed - perfect for complex designs or temporary promotions.

Made from 316 marine-grade Stainless Steel, SmartScreen posts are built to last and can withstand rigorous commercial use.

SmartScreens come in three standard Ranges: 97, 160 and 220.

The smaller posts can be supplied with either bases or ground sockets, while the taller posts are installed in ground sockets only, to ensure stability.

Posts can also be powder-coated almost any colour to give a unique look and complement your brand.

RANGE	POST HEIGHT	BASES	GROUND SOCKETS
97	970mm	✓	✓
160	1600mm	×	✓
220	2200mm	×	✓

Range 97 SmartScreens can either be supplied on bases, installed in ground sockets, or a combination of the two.

Bases come in a range of weights and diameters to suit different applications and environments - from 18kg for interior use to 38kg for windy, outdoor sites.

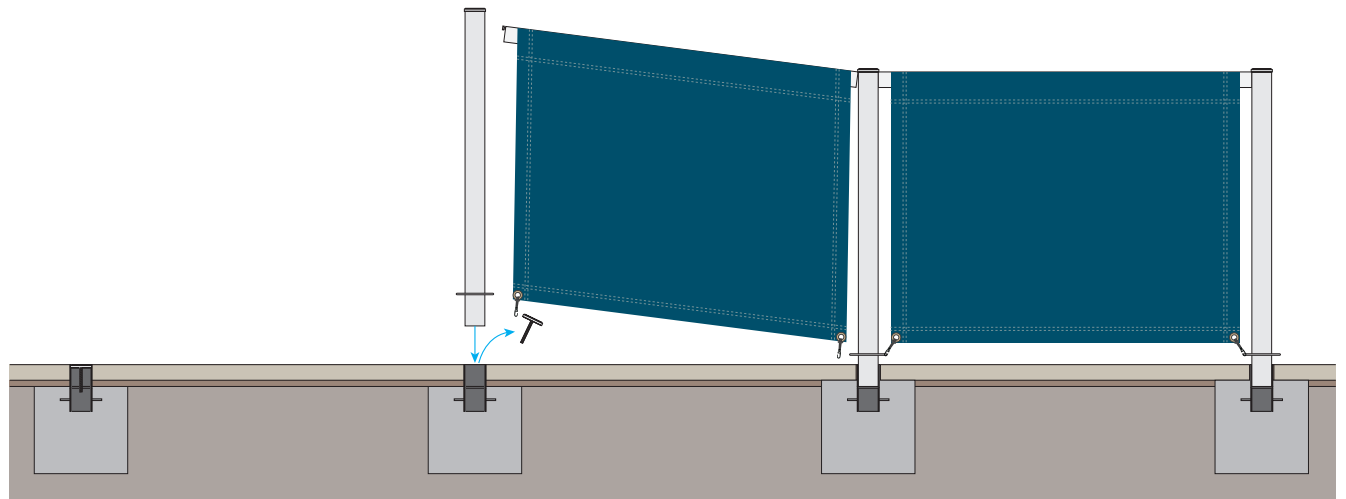

BASE TYPE	WEIGHT	DIAMETER
Interior	18kg	330mmØ
Standard Exterior	25kg	330mmØ
Wide Exterior	25kg	400mmØ
Heavy Contract Exterior	38kg	400mmØ

NOTE:
BASES ARE FOR RANGE 97
SMARTSCREENS ONLY

All our SmartScreens can be installed in ground sockets, providing a clean finish to any alfresco area and ensuring the space is maximised.

While ground sockets make the SmartScreens feel permanent, all equipment can be removed and sockets covered over easily, should you require the space to be flexible.

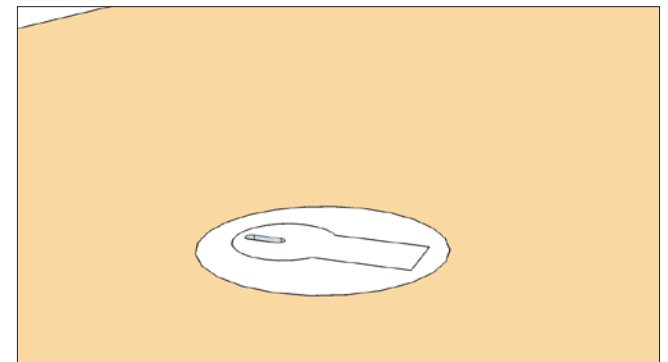

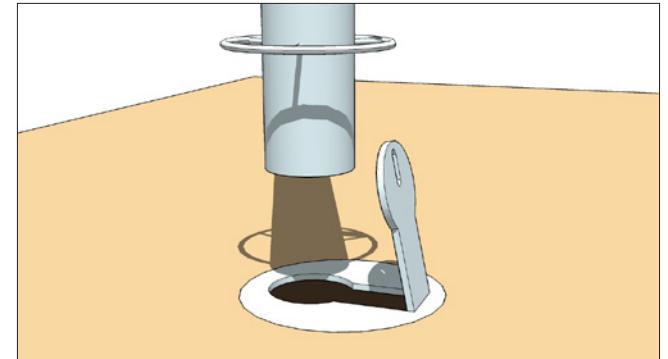

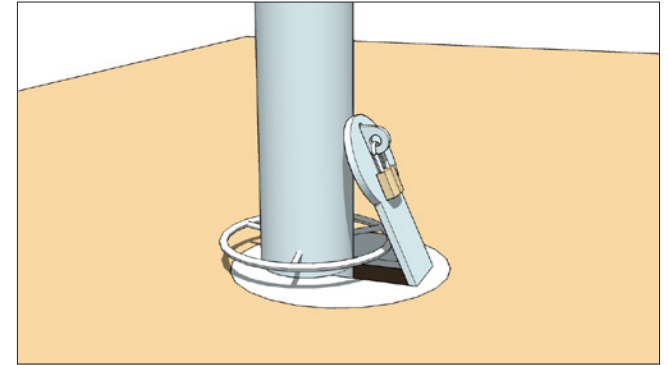

Ground sockets can be installed on a variety of surfaces, including in or along decking and up steps.

When SmartScreens are likely to be removed frequently, special “self-closing” ground sockets can be installed.

These come with a hinged lid which falls shut automatically when the post is removed, ensuring there are no trip hazards.

The posts can also be locked in place with a simple tab and padlock, ensuring extra security.
